

Valve Unit VU EP-1

Valve Unit VU EP-1

- Valve unit with electro-pneumatic valves that can be used to control Piab's vacuum conveyors with external PLC or similar electrical control system.
- Simple installation: Prepared for connection to the vacuum conveyor's main functions; start the pump, close the bottom valve, open the bottom valve, fluidisation and the filter shock.
- Prepared to be fitted with six electro-pneumatic valves. The unit is delivered with four valves and two unused spare positions.
- The valve unit has an electrical connection with an 8-pin M12x1 connector.
- The unit is delivered with a connection cable (L=2 m) that is fitted with a connector at one end.

Technical data

Description	Unit	Value
Feed pressure range	MPa	0.4–0.6
Material		PC, Neoprene
Temperature range	°C	0-50
Weight	kg	1.72
Voltage	V	24
Safety classification		IP54
Display		LED-indicators
Power consumption	W	3(×4)
Electric connection		8-pin M12×1.0
